The solution won't compile because a default constructor is missing. When declaring an array of elements, the default constructor of the element class is invoked to initialize each element, and in this case, the default constructor is not defined.

```
Run:    dry2 ×
         Straw Hat crew contains:
         Luffy, Bounty: 1000000 (Devil Fruit: Gum Gum)
         Zoro, Bounty: 500000 (Devil Fruit: None)

         Process finished with exit code 0

9: Git    4: Run    TODO    6: Problems    Terminal    CMake    Messages
Process finished with exit code 0
```
